

rhea COOL

Refreshing, delicious and healthy water and drinks
for your customers, guests and staff

The easy way to encourage concentration,
energy and wellness in the workplace.

rhea COOL

The new family of machines for fresh water, energizing lemonades, fruity juices and creamy smoothies

The cool alternative for a healthy balance and a boost of energy

Italian coffee specialties and bottled water are the standard offerings for customers and staff.

Stand out from the crowd by offering energizing water drinks, refreshing lemonades or smoothies.

Model COOL AQUA

Pure filtered water

- still
- chilled
- sparkling

Ecological + economical at its best.

rhea COOL and laRhea coffee machines - An unrivaled range of hot & cold drink options at the touch of a button

A complete beverage station in less than 1 square meter

- Refreshing cold / comforting warmth
- Stimulating bitterness / soothing sweetness
- Smooth creaminess / invigorating fizz

Advantages: increased concentration, efficiency and energy from your staff, greater appreciation from your guests.

The foundation of metabolic balance

Water is the basis of human health. Two liters a day reduces the negative effects of stress on the heart and digestive tract, boosts circulation, prevents renal disorders and supplies the body with essential minerals. Pure water delivers an immediate and natural feeling of refreshment while keeping our bodies clean and healthy.

Firewall technology

Drinking water is the most strictly controlled food product, so it's already perfectly fine to drink as it is. COOL AQUA purifies it even more with premium water filters from leading manufacturers. Additionally, our Firewall technology cleans the dispenser after each use.

Economical, eco-friendly and cost-effective

Once set up, COOL AQUA never needs refilling, because it comes directly from your drinking water main. So it's economical, since 1 glass of table water with CO2 costs less than 5 cents, and you never have to worry about buying bottled water, loading the fridge or bottle deposits. And it's eco-friendly, because COOL AQUA means bypassing the carbon footprints of the bottling, transportation, refrigeration and recycling processes.

Model COOL AQUA PLUS

Mix your own drink

- 2 fruit concentrates with
- 3 water options for
- 9 refreshing drinks

Hydration + balance = concentration, productivity and efficiency.

COOL AQUA PLUS helps to ensure the healthy intake of water our bodies need in a variety of delicious and refreshing ways.

Sparkling filtered water with delicious fruit concentrates is the ideal thirst quencher, delivering an immediate burst of freshness, hydration and flavor.

Packaging and logistics costs are minimal. 1 liter of concentrate makes 7 liters of drinks.

2 natural concentrates ensure variety, taste and vitamins, definitively putting an end to the classic 'mid-afternoon slump' in an invigorating and completely natural way.

COOL AQUA PLUS makes your favorite drink with 1 part fruit concentrate plus 6 parts water:

- still
- chilled still
- chilled sparkling
- + 2 flavors
- = 9 refreshing drinks

24/7 always ready

Mix your own drink

Perfectly filtered sparkling water available 24/7 from COOL AQUA PLUS. No CO2 emissions,

no transport logistics, no storage. Sustainable, economical and state-of-the-art.

- + Efficiency
- + Productivity
- + Concentration

= AQUA PLUS

rhea COOL

AQUA and AQUA PLUS

1 concept
2 models
